

Photoshop CS

Part 1

Tutor: Mike Jaques

Please return this booklet to me at the end of each session

How to use this guide

This guide is divided into a number of tutorials each dealing with an aspect of the programme.

Students may wish to explore the more advanced chapters in accordance with their learning preferences outside course hours.

The guide should be used as a reference point to recap on the topics learned during each lesson. This may be especially useful for students who miss a tutorial, or who prefer to explore the topic information in their own time. As teaching delivery often exceeds or does not fully cover the objectives set for each individual tutorial, this should not be relied upon as a definitive course structure however and it is not the intention of the author that it be viewed as such.

This guide does not cover all aspects of the programme in great depth; this is for both copyright and economic reasons, as a comparison, the Photoshop Bible by Deke McClelland, runs to over 400 pages! Students are therefore advised to make notes both on the taught topics and from their own experiences.

In both the teaching and within this guide, the instructions for pathways in the programme will be given as:

(Example)

Image > Adjust > Levels

This shows the pathway to a specific command.

If you require further information on a particular tool then take a look at Photoshop's in built help facility. You can access this by:

Help > Photoshop Help

Contents and Lesson Schedule

<u>TUTORIAL 1 – INTRODUCTION TO PHOTOSHOP</u>	<u>5</u>
The Photoshop Interface at a glance	5
Menu bar	5
Image Resolution	6
The Tool Box	7
Functions of the Tools	8
The Flyout Menu	10
<u>TUTORIAL 2 – LAYERS, IMAGE FORMATS AND SAVING</u>	<u>11</u>
Layers	11
The Layers Palette	12
Using Layers	14
Renaming a layer and copying it from one file to another	14
Rearranging layers	16
Linking layers	17
Image formats	23
Saving your work	24
To save your work:	24
