

Photoshop CS

Part 2

Tutor: Mike Jaques

How to use this guide

This guide is divided into a number of tutorials, each dealing with an aspect of the programme.

Students may wish to explore the more advanced chapters in accordance with their learning preferences outside course hours.

The guide should be used as a reference point to recap on the topics learned during each lesson. This may be especially useful for students who miss a tutorial, or who prefer to explore the topic information in their own time. As teaching delivery often exceeds or does not fully cover the objectives set for each individual tutorial, this should not be relied upon as a definitive course structure however and it is not the intention of the author that it be viewed as such.

This guide does not cover all aspects of the programme in great depth; this is for both copyright and economic reasons, as a comparison, the Photoshop Bible by Deke McClelland, runs to over 400 pages! Students are therefore advised to make notes both on the taught topics and from their own experiences.

In both the teaching and within this guide, the instructions for pathways in the programme will be given as:

(Example)

Image > Adjust > Levels

This shows the pathway to a specific command.

If you require further information on a particular tool then take a look at Photoshop's in built help facility. You can access this by:

Help > Photoshop Help

Contents

<u>TUTORIAL 1 – LIQUIFY AND EXTRACT</u>	<u>5</u>
The Extract Tool.....	5
The Liquify Tool.....	6
<u>TUTORIAL 2 - THE PEN TOOL</u>	<u>8</u>
The pen tool.....	8
Moving and adjusting paths.....	10
Drawing curved paths.....	15
Using paths with artwork.....	26
Converting selections to paths.....	29
Adding layers to complete the effect.....	31
<u>TUTORIAL 3 - COLOUR CORRECTION AND REPLACEMENT</u>	<u>33</u>
Cropping and straightening an image.....	33
Adjusting the tonal range of an image.....	35
Replace a specific colour in an image.....	36
Adjusting lightness with the Dodge tool.....	38
Apply the Unsharp Mask filter.....	39
<u>TUTORIAL 4 - REMOVE RED EYE</u>	<u>40</u>
<u>TUTORIAL 5 - SAVING FOR THE WEB</u>	<u>43</u>
Optimising for the Web.....	43
<u>TUTORIAL 6 – LEVELS</u>	<u>49</u>
Manually adjusting the levels.....	50
Creating an Adjustment Layer.....	52
To create an adjustment layer.....	52
Adjusting the levels.....	53
Advanced Steps – Curves.....	55
Hue Saturation Adjustment Layer.....	57
